SUMMARY

The Fullstack developer has extensive knowledge in JavaScript, TypeScript, including Node.js and React.js, Next.js, Java, Python, C++. They are proficient in designing robust backend systems using Docker and AWS. They also have experience with database technologies, building microservices architecture, real-time communication, RESTful APIs, and basic HTML and CSS skills. Additionally, they likely have experience with FastAPI, a Python framework for building high-performance APIs, which complements the Full stack well.

TECHNICAL SKILLS

- **Backend** : Node.js, Express.js, Typescript, Fastapi Framework, RESTful APIs
- **Frontend:** React.js,Next.js, HTML, CSS, Tailwind CSS
- **Database :** Mongodb, redis, MySQL, DynamoDB
- **DevOps :** Docker, Kubernates, AWS, CI/CD Automation
- **Additional Skills :** Python, GraphQL, Socket.io, Java, DSA, Grpc (basic), Microservices

EXPERIENCE

Elluminati INC, Rajkot— *MEAN Stack* - April 2024 - Present

Developed an Uber-like application with key features including real-time chat, driver live location tracking, and a robust notification system. etc - Express Js, Socket.io, RESTful APIs, Mongodb, Redis, Typescript

Artoon Solutions , Surat — *Node js* - September 2022 - March 2023

Node.js developer with a proven track record in building scalable and Efficient server-side applications. Implemented real-time features using Socket.io in GAMES. Designed and implemented RESTful APIs. Use a different database. - Express Js, Socket.io, RESTful APIs, Mongodb, Redis, Typescript

Freelancing — *Node js* - October 2021 - September 2022

I work on freelance projects in REST API and game development, like Rummy, Teen Pati, and API projects.   - Express Js, Socket.io, RESTful APIs, Mongodb, Redis, Typescript

PROJECTS

Multigaming Platform :
   I have completed rummy on multiple game platforms, in various modes. including point rummy, pool rummy, and deal rummy. - Typescript, Mongodb, Redis, Socket.io

- **3+ Rummy** — *Platform Link*
- **Artoon MGP Rummy** — *Platform Link*
- **Team-18 MGP Rummy** — *Multigaming Platform*
- **Skillwinz** — *Platform Link*

MultiTable Rummy - A single player can play multi-rummy at the same time.

Starlor - Playstore Link

   I am working on an application with key features that include real-time chat, live driver location tracking, and a robust notification system, among others.
     - Express Js, Socket.io, RESTful APIs, Mongodb, Redis, Typescript

Additional Games :

- **Rummy Challenge** - https://rummychallenge.co.in/
- **All-Rummy [POINT,POOL,DEAL]**
- **CallBreak**
- **Roulette Royale**
- **Teen Pati**

Tic-Tac-Toe : — *Linkedin_Video_link*

       I have developed a Tic-Tac-Toe project using the Python FastAPI framework for the backend and React.js for the frontend. The backend utilizes FastAPI with socket.io, Redis, and MongoDB, while for scheduling, I've used BullMq. On the frontend, I've employed React.js along with Lottie animation, React Toolkit, Material-UI (Mui), and other technologies.

EDUCATION

Government Engineering College, Godhara — Degree/Grade —June 2016 -May 2020
